#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Information Disclosure Statement***

1. The IDS, filed 11/12/03, has been considered in full.

### ***Oath/Declaration***

2. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:

Non-initialed and/or non-dated alterations have been made to the oath or declaration. See 37 CFR 1.52(c). Inventor 3. Last Name.

### ***Specification***

3. The first sentence of the specification must be updated for Rule 120 compliance.

### ***Drawings***

4. The drawings, as originally filed, are acceptable as formal.

### ***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 1-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rixon et al. (5,890,399) in view of Kelley et al. (5,613,405)

Rixon et al shows the claimed subject matter including an electric motor (fig 6, 41, 84) which rotatably drives a cable contained in a non-rotatable sheath (figure 7, (42a)); the sheath terminates at a flange (80); the cable extending out of the sheath to form an end connection (63) which when the motor is energized, the cable rotates and the end effector rotates and the pedals translate via a screw and nut interface (66e, 66b; figure 7).

Rixon et al. does not specifically show the connection of the sheath (42a) to the flange (80) as a snap fit connection.

Kelley et al. shows the use of a cable assembly which has protrusions \*48) which snap through a hole in member (24) to secure the cable assembly; Kelley et al. shows (in figure 3) the use of an inner (20) member and an outer member (44) which engage one another to provide for slight misalignments in the cable attachment point.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to substitute the cable attachment assembly of Kelley et al. for the cable attachment assembly of Rixon et al. for the purpose of providing a quick and reliable fastening system and to allow for some limited misalignment of the attachment point relative to the housing.

### ***Conclusion***

7. The following are suggested formats for either a Certificate of Mailing or Certificate of Transmission under 37 CFR 1.8(a). The certification may be included with all correspondence concerning this application or proceeding to establish a date of mailing or transmission under 37 CFR 1.8(a). Proper use of this procedure will result in such communication being considered as timely if the established date is within the required period for reply. The Certificate should be signed by the individual actually depositing or transmitting the correspondence or by an individual who, upon information and belief, expects the correspondence to be mailed or transmitted in the normal course of business by another no later than the date indicated.
